PROFESSIONAL SUMMARY

Full-stack developer (4+ years) and AWS-certified, comfortable shipping web and mobile apps end-to-end. I've worked across startups and large organizations, adapting quickly and delivering at scale. Currently pursuing an MS in Software Engineering; looking to grow in a product team where I can keep learning and contribute to useful, high-quality software.

WORK EXPERIENCE

Software Engineer — Taj Bank Ltd (Abuja, Nigeria) | Jan 2023 - Oct 2024

- Member of the digital transformation team automating and optimizing processes for HR, Compliance and Treasury departments.
- Maintained the HR platform (staff data, payroll, leave) and improved internal turnaround on requests.
- Built a compliance document-approval portal so waivers could be tracked by level, with stats on who approved and how long each step took.
- Automated Treasury reporting (previously Excel + manual submission to CBN), cutting end-of-day work from ~7-8pm to ~3pm.

Frontend Developer — Ultra Technologies (Abuja, Nigeria) | Jan 2022 - Dec 2023

- Led frontend for React Native mobile app and admin dashboard of a crypto/trading platform.
- Set up CI/CD pipelines and ensured smooth API integrations.
- Supported growth to 5,000+ daily active users and process over \$100,000 in total transactions.

Software Developer — CSPillai Private Ventures Ltd (Remote, India) | Sept 2021 - Jan 2023

- Worked across frontend, backend and AWS (full vertical) on the investment platform.
- Built the investor onboarding flow: choose a product → get contract → pay (once or in installments) → get dashboard to track investments.
- Supported onboarding of six investors, with tickets around ~\$30k each on average, and handled client-facing changes and deployments.

PROJECTS

NeoSocial — Graph-based social network with posts, likes, comments, friend requests, and groups. Builds friend and group recommendations from the graph. Includes two feeds: one from the user's network and one ranked from their engagement patterns.

Stack: React.js, TypeScript, Neo4j, Node.js, WebSockets. [GitHub](#) | [Live](#)

Fixperts —Platform connecting users to service providers (handymen, cleaners, event planners, etc.) with booking, messaging, and reviews. Providers get a calendar to manage slots, and admins can review services, approve/reject listings, and moderate users from a dashboard.

Stack: Spring Boot, MongoDB, React.js, WebSockets. [GitHub](#) | [Live](#)

Mistral Analytics Chatbot — Analytics app where you ask in natural language and get a chart of your data. Under the hood it turns the query into guarded SQL, runs it on the DB, gets JSON back, then renders the visualization in the UI.

Stack: Next.js, TypeScript, Postgres, Mistral, Recharts. [GitHub](#) | [Live](#)

EDUCATION

Institut supérieur d'électronique de Paris (ISEP) — Paris, France | Sep 2024 - Aug 2026 (Expected)

Masters in Software Engineering (BAC +5)

Afe babalola University — Ado-Ekiti, Nigeria | Sep 2015 - Jul 2020

Bachelor of Engineering, Mechatronics Engineering (BAC +4 equivalent)

TECHNICAL AND SOFT SKILLS

- **PROGRAMMING LANGUAGES:** JavaScript, TypeScript, Java
- **FRAMEWORKS/PLATFORMS:** Reactjs, Nodejs, Spring Boot, Nextjs, React Native, Convex
- **DATABASES:** PostgreSQL, MySQL, Redis, MongoDB, Neo4j
- **TESTING:** Playwright, Jest
- **TOOLS:** Git, Docker
- **SOFT SKILLS:** Teamwork, ownership, communication, problem-solving, adaptability
- **LANGUAGES:** English (Bilingual), French (B1)
- **HOBBIES:** Chess, Basketball, Badminton

CERTIFICATIONS

- **AWS Developer Associate (2024)** | [Certificate](#)
