## Interests

Basketball, Badminton, Comedy

## Summary

AWS-certified Software Engineer with **4+ years of full-stack experience**, adaptable and quick to learn new tools and environments. I enjoy building software that solves real problems and creates measurable impact, and I'm comfortable contributing across the entire development lifecycle – from understanding needs to shipping reliable, production-ready features.

## Experience

### Taj Bank

January 2023 - October 2024

Abuja, Nigeria

Software Engineer

- Led development of the **Compliance Document-Approval Platform**, replacing email chains with a structured workflow and full **audit tracking**.
- Built **compliance analytics** (bottlenecks, branch activity, approval patterns) to improve visibility and decision-making.
- Improved the **HR platform** (staff records, payroll, leave), reducing manual work and **speeding up internal processes**.
- Automated **Treasury reporting**, reducing preparation and submission time by **50%+** compared to the previous manual process.

### CSPillai Private Ventures Ltd

September 2021 – January 2023

Remote, India

Fullstack Developer

🔗 <https://cspillai.com/>

- Built the **main platform**, including the **investment flow** and **investor dashboard**, improving clarity and reducing user friction during onboarding.
- Managed the **entire AWS cloud infrastructure**, ensuring **stable deployments**, reliable environments, and smooth day-to-day operation.
- Delivered **end-to-end features** across frontend and backend, helping the team onboard high-value investors with a **faster and more consistent experience**.

### Ultra Technologies

January 2022 – December 2023

Abuja, Nigeria

Frontend Developer

🔗 <https://www.ultraapp.co/>

- Led the frontend for the **React Native mobile app** and **admin dashboard** of the trading platform.
- Set up **CI/CD pipelines** and integrated APIs to ensure smooth, reliable feature delivery.
- Contributed to scaling the platform to **5,000+ daily active users** and over **\$100k in processed transactions**.

## Education

### Institut supérieur d'électronique de Paris (ISEP)

September 2024 - August 2026

Diplôme d'ingénieur (BAC +5)

Ingénieur logiciel (Software Engineering)

### Afe Babalola University

September 2015 - July 2020

Bachelors (BAC +4)

Mechatronics Engineering

## Projects

### NeoSocial

🔗 <https://neosocial.onrender.com/>

Graph-based social network with posts, comments, groups, and friend recommendations built from user graph patterns. Includes two dynamic feeds and real-time updates.

### Fixperts

🔗 <https://fixperts.onrender.com/>

Marketplace for booking service providers with messaging, reviews, provider calendars, and an admin dashboard for moderation and listings.

### Mistral Analytics Chatbot

🔗 <https://mistral-analytics-chat.vercel.app/>

Natural-language analytics tool: transforms a user query into secure SQL, runs it, and renders charts from the results.
